

12. Illness Policy

Young children developing their immune system are susceptible to illness. Many of these are minor ailments and the children often attend all their usual activities including pre-school. At St Peter's Pre-School we will monitor any illness identified by parents and inform them of any situation that may arise during a session. The severity will affect the urgency of reporting.

If you have any concerns about your child- being unwell/cold/cough, you must inform the Supervisor before the start of the session.

- Parents are asked to keep their children at home if they have any infection, and to inform the pre-school as to the nature of the infection. This will allow the pre-school to alert other parents as necessary and to make careful observations of any child who seems unwell. Parents are asked not to send their child to pre-school if they are unwell; if a child appears unwell as they enter pre-school the parent or carer may be asked to take the child home. The supervisor will assess the situation and make a judgement as to whether the child is deemed well enough for pre-school.
- If a child should become ill at pre-school, we will contact the parent. If the parent should not be contactable, then we will telephone the emergency contact number for your child to be collected. If no one can be reached, assess the child's condition and if the condition is serious seek medical assistance. In the meantime, the child is to be nursed and comforted in the quiet by a member of staff until the parent/emergency contact arrives. If a child appears to be out of character and is suspected of becoming unwell the parents or emergency contact will be telephoned and asked to collect the child from pre-school' also 'if during a session a child has a temperature of above 37, the parents or emergency contact will be telephoned and asked to collect the child from pre-school.
- Parents are asked not to bring into the pre-school any child who has been vomiting or had diarrhoea until at least 48 hours has elapsed since the last attack. If a child during a session vomits and/or is witnessed to have diarrhoea, the parents or emergency contact will be telephoned and asked to collect the child from pre-school.
- If the children of pre-school staff are unwell, the children will not accompany their parents/carers to work in the pre-school.
- Cuts or open sores, whether on adults or children, will be covered with sticking plaster or other dressing.

St Peter's Pre-School Policies and Procedures
2014

- If the child is on prescribed medication, the following procedures will be followed:
 - * Written information will be obtained from the prescribed medication giving clear instructions about the dosage.
 - * A medication form will be completed by the parent giving permission for a member of staff to administer the medication. Administration of medication will be witnessed by two staff members, the parent will be asked to sign in recognition of administration of said medication. This information will be recorded and kept on file.
 - * All medicines will be kept in a safe place, out of reach of children.

- With regard to the administration of life-saving medication, such as insulin/adrenalin injections or the use of nebulisers, the position will be clarified by reference to the pre-school's insurance company. If specialist knowledge is required, staff involved in administering medication will receive training from a qualified health professional.

- The committee nominated Health and Safety Officer will ensure that the first aid equipment is kept clean, replenished and replaced when necessary. Sterile items will be kept sealed in their packages until needed.

- There will always be on the premises at least one qualified paediatric first aider, trained to administer first aid to children.

This policy was adopted at a meeting of the Pre-school held on(Date)

Signed on behalf of the Pre-school: (Chairperson)
